

# College queries chat bot

## 1. Admissions & Recruitment

**Automating FAQs:** Bots handle common queries on deadlines, prerequisites, tuition, and program options—freeing staff from repetitive responses .

- **Lead capture and guidance:** Chatbots collect contact info, offer personalized program suggestions, and guide applicants through submission steps .
- **Interview prep & scheduling:** Some systems help schedule admissions interviews and offer tips to ease applicants' anxiety .

## 2. Onboarding & Orientation

- **Navigational help:** Provide orientation tools like campus tours, timetable automation, hostel info, and resource links for new joiners .
- **Event engagement:** Push tailored notifications for seminars, workshops, or orientation sessions with RSVP capabilities .

## 3. Academic Support & Advising

- **Course selection aid:** Bots recommend suitable courses based on academic history and program requirements, also helping resolve scheduling conflicts .
- **Homework help & tutoring:** Provide immediate help with assignments, quizzes, and study materials—especially for shy or busy students .
- **Learning agents:** Advanced bots take on multiple roles—tutor, peer supporter, emotional guide—to enhance motivation and engagement .

## 4. Student Services & Admin Support

- **24/7 query handling:** Students receive instant responses on scheduling, transcripts, fee deadlines, library hours, and IT support via chatbots.
- **Reminders & notifications:** Bots send reminders for fee payments, exam dates, assignment deadlines, and registration windows.
- **Feedback collection:** Gather real-time student feedback on courses and services for continuous improvement .

## 5. Financial Aid & Career Services

- **Scholarship guidance:** Inform prospective students about financial aid eligibility and help navigate forms and deadlines .
- **Career & internship support:** Assist with resume writing, interview prep, and placement opportunities, enabling smoother career transitions .

## 6. Mental Health & Student Well-Being

- **First-line emotional support:** Some chatbots offer wellness check-ins, low-stress guidance, and referral to counseling—although always with clear disclaimers about their limitations .

```
def get_response(user_input):
    # Convert input to lowercase
    text = user_input.lower()
    # Keyword-based responses
    if "exam" in text:
        return "D Exams begin on September 21st. Check your studentportal for details."
    elif "hostel" in text:
        return "R Hostel registration opens August 1st on the student portal."
    elif "fee" in text:
        return "Semester fees are due by September 10th."
    elif "scholarship" in text:
        return "Scholarship applications close on August 15th."
    else:
        return "I'm not sure about that. Try asking about exams, hostel, fees, or scholarships."
